## Violence Reduction Partnership

## VRP 24-25 Strategy: Executive Summary

### About the Strategy

The full strategy to this summary, is a legal requirement, as per the Serious Violence Duty. It outlines the partnerships core strategic **priorities**, our **commitments**, and subsequent **responses** to these.

There have been several influences used to help shape and inform the strategy, however the VRP will continue to work to develop and improve the response, resulting in this being an iterative document alongside the partnerships growth.

## Our three core priorities...

The strategy is built upon three core priorities, which reflect as our **vision, purpose and mission**. They under-pin everything that we do and plan to do...

1

### People

*Eliminate serious violence, protect the vulnerable and create safer communities, through the opportunities provided by the evolving Violence Reduction Partnership.*

2

### Places

*Create safer and more resilient communities for now and the generations to come, by reducing serious violent incidents across Avon and Somerset.*

3

### Partners

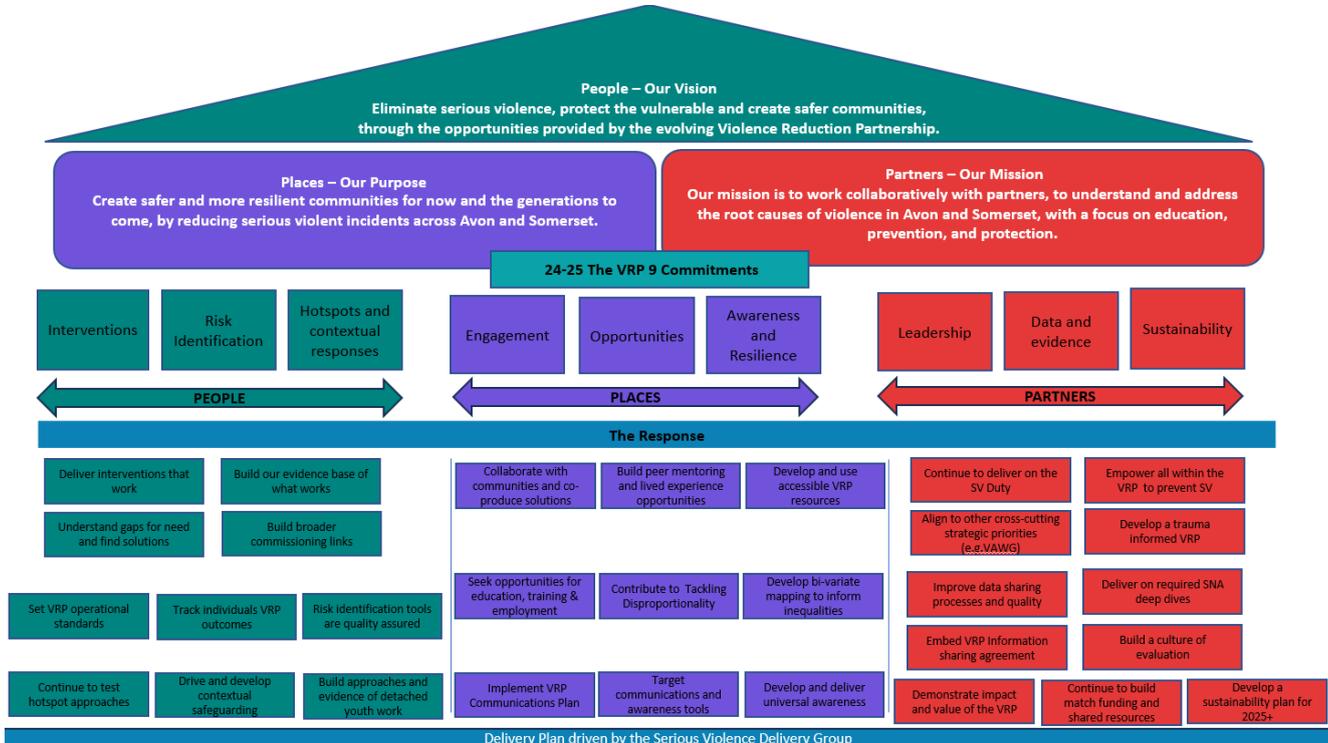

*Work collaboratively with partners, to understand and address the root causes of violence in Avon and Somerset, with a focus on education, prevention, and protection.*

# Our response and how we will deliver...

The below diagram outlines the framework to the strategy and how the three core priorities tie everything together. It sets out **9 key commitments** of the partnership, these provide the steer for our responses. **30 responses have been set out in the strategy** and will be developed by the Avon and Somerset Serious Violence Delivery group to put into action.

Over the course of 24-25, a plan will be put into place, led by the VRP Director. The progress of this plan will be regularly reviewed and reported on to the Serious Violence Reduction Partnership Board.
